Great game to keep those waiting for MCC on Steam busy.. I played this game a lot on xbox 360 and its really fun. Im happy its on steam.. hahahaha yes. "I'm just waiting for MCC to come out" said DIO. I GUESS IT COULD BE WORSE. THE MULTIPLAYER ISNT ACTIVE. Just got the game and discovered to my intense annoyance that you cannot save skirmish games. I have no plans to play multiplayer, so this makes game sessions take much longer, especially for my son, who has only a modest video game time allowance per day. Just playing a single skirmish game takes a while, especially when you can't save it.

So be aware you can't save the game if not playing online\multiplayer.. i really like RTS and Halo and this is a well made combination of the 2. very good game, even ppl who arent into Halo but like RTS might enjoy this as well.

halo wars
halo is fun
i don't like RTS games
but this...
this is true art. ****ALL UNITS****

Ahh... nostalgia...

It's a simple but fun RTS. play with a buddy.. Its good for a couple of play through, but it isn't the best RTS, still the story is good and def a buy when on sale. Wait! I actually really do like this game!

As an RTS, its really simple and fun to construct and play. The campaign is great, the models\\music are great, and the game is overall a 9\\10-BUT- it came out a VERY long time ago.

The problem with that, is the majority of multiplayer doesn't exist anymore. The game has very low solo player replay value and because of the way the multiplayer works in 2019, I can't recommend anyone buy it anymore D:

Its not a slight on the games quality, so much as telling people not to drop 20\$ on a game that, in 2019, is so limited when they're alternatives, such as Age of Empires: Definitive Edition, with much more stable multiplayer communities.. amazing game. played it on xbox and was thrilled to see a PC release. however, if your planning on playing multiplayer like i was you'll be very disappointed...i bought this on steam thinking i could re-live those awesome days playing against other people but it seems the multiplayer on PC is non-existent. i've tried many times to find an online match to play and the game can never find any players. so all in all, if you want to re-live the awesome campaign for this game or just mess around with some buddy's in skirmish in 60FPS then go for it. If your looking to purchase because you want to play online multiplayer as i did, you'll be disappointed.
